Skills

- Python programming ●●●●●
- Matlab programming ●●●●●
- Deep Learning ●●●●●
- Machine Learning ●●●●●
- Signal Processing ●●●●●
- Image Processing ●●●●●

Education

- Master of Artificial Intelligence** 09/2022 - Present
Azad University, North Tehran Branch, Tehran
GPA: 19.02 out of 20
- Bachelor of Software Engineering** 09/2018 - 06/2022
Roshdiyeh University, Tabriz, East Azerbaijan Province
GPA: 15.80 out of 20

Work Experience

- Freelance Programmer** 11/2020 - Present
Tehran
Getting Artificial Intelligence projects from freelance sites
- Teaching Assistant** 09/2023 - Present
Azad University, North Tehran Branch, Tehran
Course: Digital Signal Processing
Prof. Maliheh Sabeti
 - Conducting tutorials & lab sessions (EEGLAB Tutorial in MATLAB)
 - Assisting with course preparation
 - Mentoring and Advising Students
- Teaching assistant** 09/2023 - Present
Azad University, North Tehran Branch, Tehran
Course: Digital Image Processing
Prof. Maliheh Sabeti
 - Mentoring and Advising Students

Profile Summary

I am an Artificial Intelligence engineer with a background in image processing, who is currently studying for a master's degree in Artificial Intelligence and also graduated from the field of Software Engineering from Roshdiyeh University in Tabriz.

My experience includes working with algorithms, AI projects, programming and debugging. I have also worked with programming languages such as Python, MATLAB and C++. In addition, I have extensive knowledge in Machine Learning and Deep Learning, and I am interested in learning new knowledge and participating in challenging projects.

Research Interests

- Brain Computer Interface (BCI)
- Biomedical Signal Processing
- Natural Language Processing
- Digital Image Processing
- Deep Learning

C++ programming ●●●●●

HTML programming ●●●●●

CSS programming ●●●●●

PHP programming ●●●●●

Linux ●●●●●

Research Methodology ●●●●●

Proficient in ICDL ●●●●●

Cooperation and team participation ●●●●●

Commitment and responsibility ●●●●●

Time management and planning ●●●●●

Certificates

Data Processing with Deep Learning 02/2023

Techniques based on Python

I have completed this 30-hour course at the National Brain Mapping Lab

Neuroscience Data Processing with Deep 06/2023

Learning Techniques based on Python

I have completed this advanced 21-hour course at the National Brain Mapping Lab

Artificial Intelligence algorithms project in the 08/2023

fields of diagnosis, treatment and prognosis

This course was held under the supervision of the Functional Neurosurgery Research Center (FNRC) and Iran Elites Network and in collaboration with the Shahid Beheshti University.

Artificial Intelligence algorithms project 09/2023

I have successfully completed the advanced course of the Artificial Intelligence algorithms project offered by the Student Scientific Association of Neurosurgery.

Comprehensive Course on Neuroanatomy, 01/2023

Neurophysiology and Reviewing Neurological and Psychiatric Disorders

I have completed this 28-hour course at the National Brain Mapping Lab

International Computer Driving License 09/2022

I have completed this 130-hour course at the Iran Technical and Vocational Training Organization.

Projects

Hydrocephalus classification using deep 08/2023 - Present

learning

Publishing the article

Researching and writing an article regarding the classification of hydrocephalus using deep learning

Bone age estimation with convolutional 12/2022

neural network

Master's project

Estimation of bone age using X-Ray images with the Convolutional Neural Network

- Related link: <https://github.com/Armin-Abdollahi/Bone-Age-Estimation>

Multilayer Perceptron Neural Network 10/2023

Master's Project

Implementation of Multilayer Perceptron Neural Network on MNIST, CIFAR-10, and Boston house Price datasets with TensorFlow and PyTorch frameworks.

- Related link: <https://github.com/Armin-Abdollahi/Multilayer-Perceptron-Neural-Network>

Iris flower classification 12/2022

Master's Project

This project focuses on IRIS flower classification using machine learning and using scikit tools.

- Related link: <https://github.com/Armin-Abdollahi/Iris-Flower-Classification>

Implementation of Deep Learning algorithms

11/2023 - Present

Master's Project

Implementation of Deep Learning algorithms such as: Long Short-Term Memory (LSTM), Recurrent Neural Network (RNN), Generative Adversarial Networks (GAN) in TensorFlow and PyTorch frameworks.

- Related link:

1. <https://github.com/Armin-Abdollahi/Long-Short-Term-Memory>
2. <https://github.com/Armin-Abdollahi/Recurrent-Neural-Network>
3. <https://github.com/Armin-Abdollahi/Generative-Adversarial-Networks>

MNIST Handwritten digit recognition with a graphical interface

06/2023

Master's Project

Recognition of handwriting digit with a graphical user interface using the Python programming language

- Related link: <https://github.com/Armin-Abdollahi/Handwriting-Recognition>

Implementation of Optimization Algorithms

11/2022

Master's Project

Implementation of Optimization Algorithms such as: Particle Swarm Optimization, Genetic, Gray Wolf Optimization, Differential Evolution, Firefly

- Related link:

1. <https://github.com/Armin-Abdollahi/Particle-Swarm-Optimization>
2. <https://github.com/Armin-Abdollahi/Genetic-Algorithm>
3. <https://github.com/Armin-Abdollahi/Gray-Wolf-Optimization>
4. <https://github.com/Armin-Abdollahi/Differential-Evolution>
5. <https://github.com/Armin-Abdollahi/Firefly-Algorithm>

Robot Navigation

12/2022

Master's Project

Building a robot simulator and routing it through obstacles in the MATLAB environment

- Related link: <https://github.com/Armin-Abdollahi/Robot-Navigation>

Face Recognition

03/2023

Freelance Project

Face recognition in video and images with OpenCV

- Related link: <https://github.com/Armin-Abdollahi/Face-Recognition>

Face Detection with Viola-Jones Algorithm

- Related link: <https://github.com/Armin-Abdollahi/Face-Detection>

Signal Processing

07/2023

Master's Project

EEGLAB Tutorial in MATLAB, Implementation of Butterworth and Elliptic filters, Steganography code

- Related link: <https://github.com/Armin-Abdollahi/Signal-Processing>

Image Processing

07/2023

Master's Project

Implementation of several image processing filters in MATLAB

- Related link: <https://github.com/Armin-Abdollahi/Image-Processing>

Computer Vision

06/2023

Master's Project

This project includes Camera Calibration, Edge Detection, Image Blending, Pyramid, Template Matching and Vanishing Points

- Related link: <https://github.com/Armin-Abdollahi/Computer-Vision>

Boston house price prediction

12/2022

Master's Project

In this project, we developed and evaluated the performance and predictive power of a model trained and tested on data collected from houses in Boston's suburbs.

- Related link: <https://github.com/Armin-Abdollahi/Boston-House-Price-Prediction>

Making a shooter game with unity

12/2021

Bachelor's project

Making Shooter game for phone and computer with Unity

- Related link: <https://github.com/Ray-Studio/Shooter-Game>

Simple python projects

08/2023

Freelance Project

This project includes 17 codes as follows:

Binary Search Algorithm, Calculator, Countdown Timer, Currency Converter, Dice Simulation, Email Slicer, Hangman, Music Player, Password Generator, QR Code Generator, Quiz Application, Rock Paper Scissors, Snake Game, Tic Tac Toe, Typing Speed Test, Voice Recorder, YouTube Downloader

- Related link: <https://github.com/Armin-Abdollahi/Simple-Python-Projects>

Text Translation and Summary

10/2023

Freelance Project

Python project that takes the text and translates and summarizes it.

- Related link: <https://github.com/Armin-Abdollahi/Translate-And-Summarize-The-Text>

Web Design

11/2020

Freelance Project

Custom Apple website design

- Related links: <https://github.com/Armin-Abdollahi/Apple-Website>

W3schools website homepage design

- Related links: <https://github.com/Armin-Abdollahi/W3schools>
